All state and local law-enforcement agencies shall collect the data specified in subsections C and D of § 52-30.2, and any other data as may be specified by the Department of State Police, on forms developed by the Department of State Police and submit such data to the Department of State Police for inclusion in the Community Policing Reporting Database.

Definitions

Investigatory Detention

An “investigatory detention” is a temporary deprivation of a person’s liberty for investigative purposes based upon reasonable suspicion that the person has committed, is committing, or is about to commit a crime or infraction. The following items are investigative detentions which require data collection:

- all investigatory motor vehicle stops
- all stop-and-frisks of a person based on reasonable suspicion
- all other investigatory or temporary detentions of a person during any investigative stop

Q: Are there any restrictions on the type of stop data reported by a law enforcement agency?

A: Department of Virginia State Police will accept all data submitted that complies with the Instructions and Technical Specifications; where placement in any given category can be reasonably explained. While Department of Virginia State Police does attempt to provide guidance on data collection, it is ultimately up to each agency to determine which scenarios meet the undefined criteria of the Community Policing Act.

Q: Is data reporting required for pedestrian stops?

A: Yes. Based on the expanded definition of stops to be collected by Senate Bill 5030, pedestrian stops are required as of July 1, 2021. Each person subject to an investigatory detention stop is a separate entry in the Community Policing data collection.

Q: Do we collect passenger information during a motor vehicle stop?

A: Passenger information is collected as a separate stop if the passenger is part of an investigatory detention stop. Each person subject to an investigatory detention stop is a separate entry in the Community Policing data collection.

Q: Are motor vehicle accidents considered "motor vehicle stops" for purposes of the Community Policing Act's data collection?

A: In most instances the parties have already stopped and are voluntarily waiting for an officer to investigate the incident. Therefore, collection of community policing data on traffic accidents is not required. However, it is ultimately up to each agency to determine which scenarios meet the undefined criteria of the Community Policing Act. The department will accept traffic accident data from those agencies that choose to report it under any of the following reasons for stop: "traffic violation", "calls for service", or "other".
